SUBSCRIPTION OFFICE:

CLAYS AND CLAY MINERALS

P.O. Box 368
Lawrence, Kansas 66044
(913)-843-1234

Communications concerning membership in **THE CLAY MINERALS SOCIETY** should be addressed to **THE CLAY MINERALS SOCIETY, EDITORIAL OFFICE, CENTRAL OFFICE MANAGER**.

Communications regarding new subscriptions, change of address, nonreceipt of issues, back issues, and reprints should be directed to the **CLAYS AND CLAY MINERALS SUBSCRIPTION OFFICE**.

SCOPE OF THE JOURNAL

CLAYS AND CLAY MINERALS is the official publication of **THE CLAY MINERALS SOCIETY**. From 1952 through 1967 the publication has taken the form of an annual Proceedings Volume containing primarily the papers presented at the annual Clay Minerals Society Conferences. The publication was expanded in 1968 to a bi-monthly JOURNAL that will undertake to publish all papers of interest to clay scientists. Manuscripts will be welcome from all countries.

The aim of **CLAYS AND CLAY MINERALS** will be to present the latest advances in research and technological progress in clays. Like its parent Society the JOURNAL will strive to promote advancement of knowledge among individuals in the many diverse disciplines interested in clay mineral science and technology. For these reasons the JOURNAL should be of value to mineralogists, soil scientists, physical chemists, colloid chemists, ceramists, X-ray crystallographers, geochemists, agronomists, stratigraphers, paper chemists, petroleum engineers, civil engineers, foundry engineers, soil mechanics engineers, and other workers concerned with clays. Despite their diverse backgrounds and special interest and objectives, workers in clay mineralogy have much in common. Basically their problems revolve around the structures, properties, origins, and occurrences of clay minerals. **CLAY AND CLAY MINERALS** will strive to promote dissemination of the most recent theoretical and research developments in all of these aspects of clays.

SUBSCRIPTION RATES

INSTITUTIONAL:

For libraries, university departments, government laboratories, industrial and other multiple-reader institutions, U.S. \$76.00. Institutional subscriptions are available on a two-year basis at a reduced rate of U.S. \$144.50.

INDIVIDUAL:

Any individual whose institution takes out a library subscription may purchase a second or additional subscription for personal use at a much reduced rate of U.S. \$30.00. No reduction for two-year subscriptions.

SOCIETY MEMBERS:

Bona-fide subscribing members of **THE CLAY MINERALS SOCIETY** receive the journal as part of their membership.

CLAYS AND CLAY MINERALS is published bi-monthly and subscriptions are available on a calendar-year basis only. Subscription rates include surface mail delivery in North America and air freight or airmail to all other parts of the world.

Copyright © 1978, **THE CLAY MINERALS SOCIETY**

Individual readers of this JOURNAL, and nonprofit libraries acting in their behalf, are freely permitted to make fair use of the material in it, such as to copy an article for use in teaching or research. Permission is hereby granted to quote from this JOURNAL in scientific works when an acknowledgment of the source accompanies the work. Reprint of a figure, table, photograph, or other excerpt requires written consent of one of the original authors and notification to **THE CLAY MINERALS SOCIETY** in writing. Reproduction or systematic or multiple reproduction of any material in this JOURNAL (including abstracts) is permitted only under license from **THE CLAY MINERALS SOCIETY**.

CONTENTS

Number 1

Classification of Kaolins Exemplified by their Textures in Scan Electron Micrographs <i>W. D. Keller</i>	1
Hydroxy-Nickel Interlayering in Montmorillonite by Titration Method <i>S. Yamanaka and G. W. Brindley</i>	21
Observation of the Hydrated Form of Tubular Halloysite by an Electron Microscope Equipped with an Environmental Cell <i>N. Kohyama, K. Fukushima and A. Fukami</i>	25
An Experimental Study of Cadmium Ion Exchangeability <i>R. E. Ferrell, Jr. and C. A. Price</i>	41
Selectivity and Adsorption Capacity of Smectite and Vermiculite for Aluminum of Varying Basicity <i>J. A. Veith</i>	45
The Electrostatic Interlayer Forces of Layer Structure Minerals <i>R. F. Giese</i>	51
Sepiolite Deposits of the Las Vegas, Nevada Area <i>J. L. Post</i>	58
Synthesis of Iron Layer Silicate Minerals under Natural Conditions <i>H. Harder</i>	65
Identification of Tetramethylammonium Ion in Methylated NH_4 -Bentonite <i>M. A. Franco, C. Gessa and F. Cariati</i>	73
Note The Stability of Fluorine Analogues of Kaolinite <i>R. W. Wolfe and R. F. Giese, Jr.</i>	76
Book Reviews: An Introduction to Clay Colloid Chemistry, 2nd edition, by H. van Olphen <i>G. W. Brindley</i>	79
Minerals in Soil Environments, edited by J. B. Dixon and S. B. Weed <i>R. A. Rowland</i>	79
Announcement	80

Number 2

Kaolinite Intercalation Procedure for all Sizes and Types with X-ray Diffraction Spacing Distinctive from other Phyllosilicates <i>M. L. Jackson and F. H. Abdel-Kader</i>	81
Reduction and Oxidation of Fe^{3+} in Dioctahedral Smectites—III. Oxidation of Octahedral Iron in Montmorillonite <i>I. Rozenson and L. Heller-Kallai</i>	88

Vanadium-Titanium-Bearing Mixed-Layered Clay from Potash Sulphur Springs, Arkansas <i>G. R. McCormick</i>	93
Copper(II) Interactions with Kaolinite: Factors Controlling Adsorption <i>M. B. McBride</i>	101
Cross-Linked Smectites. I. Synthesis and Properties of Hydroxy-Aluminum-Montmorillonite <i>N. Lahav, U. Shani, and J. Shabtai</i>	107
Cross-Linked Smectites. II. Flocculation and Microfabric Characteristics of Hydroxy-Aluminum-Montmorillonite <i>N. Lahav and U. Shani</i>	116
The Ordering of Cetylpyridinium Bromide on Vermiculite <i>P. G. Slade, M. Raupach, and W. W. Emerson</i>	125
A Direct Procedure for Determining the Number of Plates in Tactoids of Smectites: The Na/Ca—Montmorillonite Case <i>I. Shomer and U. Mingelgrin</i>	135
Characterization of the Particle Size and the Crystallinity of Certain Minerals by IR Spectrophotometry and other Instrumental Methods—II. Investigations on Quartz and Feldspar <i>J. Hlavay, K. Jonas, S. Elek, and J. Inczedy</i>	139
Intercalation of Salts in Halloysite <i>R. M. Carr, N. Chaikum, and N. Patterson</i>	144
The Influence of the Activity of Water on the Phase Composition of Aluminum Hydroxides formed by Reaction of Amalgamated Aluminum with Water <i>O. Lahodny-Šarc, Z. Dragčević, and D. Došen-Šver</i>	153
Scanning Electron Microscopy of Quartz in Precambrian Cherts and Dolomites from Southern Africa <i>J. le Roux and M. L. Jackson</i>	160
Differential Scanning Calorimetric Study of the Kaolinite: N-Methylformamide Intercalate <i>J. M. Adams</i>	169
Notes: Mössbauer Spectra of Glauconites Reexamined <i>I. Rozenson and L. Heller-Kallai</i>	173
The Mössbauer Spectra of Nontronites: Consideration of an Alternative Assignment <i>B. A. Goodman</i>	176
1,10-Phenanthroline Complexes of Fe(II) and Cu(II) Adsorbed onto Hectorite Surfaces <i>R. D. Gillard and P. A. Williams</i>	178
Comment Clays and Clay Minerals—A 25-Year Retrospect <i>H. H. Murray</i>	180

Number 3

Semiquantitative Chemical Analysis of Asbestos Fibers and Clay Minerals with an Analytical Electron Microscope <i>H. Hayashi, S. Aita, and M. Suzuki</i>	181
Amorphous and Crystalline Titanium and Iron-Titanium Oxides in Synthetic Preparations, at Near Ambient Conditions, and in Soil Clays <i>R. W. Fitzpatrick, J. le Roux, and U. Schwertmann</i>	189
Quantitative Estimation of Kaolinite in Sediments by Differential Infrared Spectroscopy <i>J.-M. Rousseaux</i>	202

Experimental Transformation of 2M Sericite into a Rectorite-Type Mixed-Layer Mineral by Treatment with Various Salts. II. Experiments using a Magnetic Stirrer and a Centrifuge <i>K. Tomita</i>	209
Extrapolation of Aqueous Dissolution Data to Determine Comparative Free Energies of Formation (ΔG_f°), and Relative Mineral Stabilities <i>A. L. Reesman</i>	217
Clay Minerals as Indicators of Sediment Source in Tidal Estuaries of Long Island Sound <i>B. L. Sawhney and C. R. Frink</i>	227
The Determination of Feldspars in Mudrocks using an X-ray Powder Diffraction Method <i>P. M. Fellows and D. A. Spears</i>	231
Flint-Clay Facies Illustrated within One Deposit of Refractory Clay <i>W. D. Keller</i>	237
Book Review X-ray Structural Analysis of Mixed-Layer Minerals, by V. A. Drits and B. A. Sakharov <i>A. Wiewióra</i>	244

Number 4

Scanning Electron Microscope Study of Bauxites of Different Ages and Origins <i>Gy. Bárdossy, A. Csanády, and A. Csordás</i>	245
Electron Spin Resonance Studies of Iron Oxides Associated with the Surface of Kaolins <i>B. R. Angel and W. E. J. Vincent</i>	263
The I.R. Spectra of Dimethyl Sulfoxide Adsorbed on Several Cation-Substituted Montmorillonites <i>G. A. Garwood, Jr. and R. A. Condrate, Sr.</i>	273
The Exchange of Alkylammonium Ions on Na-Laponite <i>E. F. Vansant and G. Peeters</i>	279
Clay-Organic Molecule Interactions: Oxidation of Acetaldehyde by Montmorillonite in N ₂ Atmosphere at Room Temperature <i>I. M. Eltantawy and M. Baverez</i>	285
Unifying Features Relating to the 3D Structures of Some Intercalates of Kaolinite <i>J. M. Adams</i>	291
The Conversion of X-ray Intensity Ratios to Composition Ratios in The Electron Probe Analysis of Small Particles Using Mineral Standards <i>M. A. F. Pyman, J. W. Hillyer, and A. M. Posner</i>	296
The Effect of Grinding on the Structure and Behavior of Bentonites <i>U. Mingelgrin, L. Kliger, M. Gal, and S. Saltzman</i>	299
Tribute to Richards A. Rowland <i>Haydn H. Murray</i>	308

Number 5

The Adsorption of N-Aliphatic Alcohols from Dilute Aqueous Solutions on RNH_3 -Montmorillonites. Part I. Distribution at Infinite Dilution <i>M. S. Stul, A. Maes, and J. B. Uytterhoeven</i>	309
Ion Exchange and Intersalation Reactions of Hectorite with Tris-Bipyridyl Metal Complexes <i>M. F. Traynor, M. M. Mortland, and T. J. Pinnavaia</i>	318
Reaction Series for Dioctahedral Smectites <i>D. Eberl</i>	327
Dissolution of Smectites in Hydrochloric Acid: II. Dissolution Rate as a Function of Crystallochemical Composition <i>I. Novák and B. Číćel</i>	341
Relation between Swelling, Surface Area and <i>b</i> Dimension of Na-Montmorillonites <i>J. W. Odom and P. F. Low</i>	345
Characterization of Morphological Features of Soil Micas using Scanning Electron Microscopy <i>J. G. Tarzi and R. Protz</i>	352
A Comparison of the Effectiveness of Eight Methods for the Removal of Organic Matter from Clay <i>A. D. van Langeveld, S. J. van der Gaast, and D. Eisma</i>	361
Reactions of Zinc with Acid and Base Saturated Dickites <i>J. P. Singhal and G. K. Gupta</i>	365
Note Chemical Determination of Clay Content of Mineralogical Samples with Nickel (II) Ammine Complexes <i>R. B. Barrett and C. S. Wickham</i>	372

Number 6

The Influence of Aluminum on Iron Oxides. Part I. The Influence of Al on Fe Oxide Formation from the Fe(II) System <i>R. M. Taylor and U. Schwertmann</i>	373
Effects of Micro-Sized Mixtures of Kaolin Minerals on Properties of Kaolinites <i>W. D. Keller and R. P. Haenni</i>	384
Kaolinite Synthesis. I. Crystallization Conditions at Low Temperatures and Calculation of Thermodynamic Equilibria. Application to Laboratory and Field Observations <i>A. La Iglesia and M. C. Van Oosterwyck-Gastuche</i>	397
Kaolinite Synthesis. II. A Review and Discussion of the Factors Influencing the Rate Process <i>M. C. Van Oosterwyck-Gastuche and A. La Iglesia</i>	409

Preparation of Organosilicate Compounds from Phlogopite by Trimethylsilylation <i>K. Kuroda and C. Kato</i>	418
Quantitative Clay Mineralogical Analyses from the Bulk Chemistry of Sedimentary Rocks <i>M. J. Pearson</i>	423
The Release of Aluminum from Aluminosilicate Minerals. I. Kinetics <i>F. Cabrera and O. Talibudeen</i>	434
Adsorption of N ₂ , O ₂ , CO ₂ , and H ₂ on Hydrotalcite-Like System: Mg ²⁺ -Al ³⁺ -(Fe(CN) ₆) ⁴⁻ <i>S. Miyata and T. Hirose</i>	441
The Occurrence of Lepidocrocite in Two Well-Drained Ontario Soils <i>J. G. Tarzi and R. Protz</i>	448
Book Review Seventh Conference on Clay Mineralogy and Petrology in Karlovy Vary, <i>edited by J. Konta</i> <i>G. W. Brindley</i>	452
Erratum	452

SUBJECT-AUTHOR INDEX—VOLUME 26

A

- ABDEL-KADER, F. H. (with M. L. JACKSON): Kaolinite intercalation procedure for all sizes and types with X-ray diffraction spacing distinctive from other phyllosilicates 81
- Acetaldehyde, Clay-organic molecule interactions: Oxidation of, on montmorillonite in N_2 atmosphere at room temperature 285
- Activity, The influence of the, of water on the phase composition of aluminum hydroxides formed by reaction of amalgamated aluminum with water 153
- ADAMS, J. M.: Differential scanning calorimetric study of the kaolinite: N-methylformamide intercalate 169
- ADAMS, J. M.: Unifying features relating to the 3D structures of some intercalates of kaolinite 291
- Adsorption, Copper(II) interactions with kaolinite: Factors controlling 101
- Adsorption of N_2 , O_2 , CO_2 , and H_2 on hydrotalcite-like system: $Mg^{2+}-Al^{3+}-(Fe(CN)_6)^{4-}$, by S. Miyata and I. Hirose 441
- The adsorption of N-aliphatic alcohols from dilute aqueous solutions on RNH_3 -montmorillonites. Part I. Distribution at infinite dilution, by M. S. Stul, A. Maes, and J. B. Uytterhoeven 309
- Adsorption, Selectivity and, capacity of smectite and vermiculite for aluminum of varying basicity 45
- AITA, S. (with H. HAYASHI and M. SUZUKI): Semiquantitative chemical analysis of asbestos fibers and clay minerals with an analytical electron microscope (See erratum p. 452) 181
- Aliphatic alcohols, The adsorption of, from dilute aqueous solutions on RNH_3 -montmorillonites. Part I. Distribution at infinite dilution 309
- Alkylammonium, The exchange of, ions on Na-laponite 279
- Aluminosilicate minerals., The release of aluminum from, I. Kinetics 434
- Aluminum hydroxides, The influence of the activity of water on the phase composition of, formed by reaction of amalgamated aluminum with water 153
- Aluminum, Selectivity and adsorption capacity of smectite and vermiculite for, of varying basicity 45
- Amorphous and crystalline titanium and iron-titanium oxides in synthetic preparations, at near ambient conditions, and in soil clays, by R. W. Fitzpatrick, J. le Roux, and U. Schwertmann 189
- ANGEL, B. R. (with W. E. J. VINCENT): Electron spin resonance studies of iron oxides associated with the surface of kaolins 263
- Asbestos, Semiquantitative chemical analysis of, fibers and clay minerals with an analytical electron microscope (See erratum p. 452) 181

B

- BÁRODOSSY, GY. (with A. CSANÁDY and A. CSORDÁS): Scanning electron microscope study of bauxites of different ages and origins 245
- BARRETT, R. B. (with C. S. WICKHAM): Chemical determination of clay content of mineralogical samples with nickel (II) ammine complexes 372
- Bauxites, Scanning electron microscope study of, of different ages and origins 245
- BAVEREZ, M. (with I. M. ELTANTAWY): Clay-organic molecule interactions: Oxidation of acetaldehyde by montmorillonite in N_2 atmosphere at room temperature 285
- b* dimension, Relation between swelling, surface area and, of Na-montmorillonites 345
- Book Reviews:
- An Introduction to Clay Colloid Chemistry, 2nd edition, by H. van Olphen (Reviewed by G. W. Brindley) 79
- Minerals in Soil Environments, edited by J. B. Dixon and S. B. Weed (Reviewed by R. A. Rowland) 79
- Seventh Conference on Clay Mineralogy and Petrology in Karlovy Vary, edited by J. Konta, Univerzita Karlova Praha (Reviewed by G. W. Brindley) 452
- X-ray Structural Analysis of Mixed-Layer Minerals, by V. A. Drits and B. A. Sakharov (Reviewed by A. Wiewióra) 244
- BRINDLEY, G. W. (with S. YAMANAKA): Hydroxy-nickel interlayering in montmorillonite by titration method 21

C

- CABRERA, F. (with O. TALIBUDEEN): The release of aluminum from aluminosilicate minerals. I. Kinetics 434
- Cadmium ion exchangeability, An experimental study of 41
- Calorimetric study, Differential scanning, of the kaolinite: N-Methylformamide intercalate 169
- CARIATI, F. (with C. GESSA and M. A. FRANCO): Identification of tetremethylammonium ion in methylated NH_4 -bentonite 73
- CARR, R. M. (with N. CHAIKUM and N. PATTERSON): Intercalation of salts in halloysite 144
- Cetylpyridinium, The ordering of, bromide on vermiculite 125
- CHAIKUM, N. (with R. M. CARR and N. PATTERSON): Intercalation of salts in halloysite 144

Characterization of morphological features of soil micas using scanning electron microscopy, by J. G. Tarzi and R. Protz 352

Characterization of the particle size and the crystallinity of certain minerals by IR spectrophotometry and other instrumental methods—II. Investigations on quartz and feldspar, by J. Hlavay, K. Jonas, S. Elek, and J. Inczedy 139

Chemical determination of clay content of mineralogical samples with nickel (II) ammine complexes, by R. B. Barrett and C. S. Wickham 372

Cherts, Scanning electron microscopy of quartz in Precambrian, and dolomites from Southern Africa 160

ČIČEL, B. (with I. NOVÁK): Dissolution of smectites in hydrochloric acid: II. Dissolution rate as a function of crystallochemical composition 341

Classification of kaolins exemplified by their textures in scan electron micrographs, by W. D. Keller 1

Clay content, Chemical determination of, of mineralogical samples with nickel (II) ammine complexes 372

Clay minerals as indicators of sediment source in tidal estuaries of Long Island Sound, by B. L. Sawhney and C. R. Frink 227

Clay-organic molecule interactions: Oxidation of acetaldehyde on montmorillonite in N₂ atmosphere at room temperature, by I. M. Eltantawy and M. Baverez 285

A comparison of the effectiveness of eight methods for the removal of organic matter from clay, by A. D. van Langeveld, S. J. van der Gaast, and D. Eisma 361

CONDRAE, R. A., SR. (with G. A. GARWOOD, JR.): The i.r. spectra of dimethyl sulfoxide adsorbed on several cation-substituted montmorillonites 273

The conversion of X-ray intensity ratios to composition ratios in the electron probe analysis of small particles using mineral standards, by M. A. F. Pyman, J. W. Hillyer, and A. M. Posner 296

Copper(II) interactions with kaolinite: Factors controlling adsorption, by M. B. McBride 101

Cross-linked smectites. I. Synthesis and properties of hydroxy-aluminum-montmorillonite, by N. Lahav, U. Shani, and J. Shabtai 107

Cross-linked smectites II. Flocculation and microfabric characteristics of hydroxy-aluminum-montmorillonite, by N. Lahav and U. Shani 116

Crystalline conditions, Kaolinite synthesis I., at low temperatures and calculation of thermodynamic equilibria. Application to laboratory and field observation 397

CSANÁDY, A. (with GY. BÁRDOSSY and A. CSORDÁS): Scanning electron microscope study of bauxites of different ages and origins 245

CSORDÁS, A. (with A. CSANÁDY and GY. BÁRDOSSY): Scanning electron microscope study of bauxites of different ages and origins 245

D

3D structures, Unifying features relating to the, of some intercalates of kaolinite 291

The determination of feldspars in mudrocks using an X-ray powder diffraction method, by P. M. Fellows and D. A. Spears 231

Dickites, Reactions of zinc with acid and base saturated 365

Differential scanning calorimetric study of the kaolinite: N-Methylformamide intercalate, by J. M. Adams 169

Dimethyl sulfoxide, The i.r. spectra of, adsorbed on several cation-substituted montmorillonites 273

A direct procedure for determining the number of plates in tactoids of smectites: The Na/Ca montmorillonite case, by I. Shomer and U. Mingelgrin 135

Dissolution of smectites in hydrochloric acid: II. Dissolution rate as a function of crystallochemical composition, by I. Novák and B. Čičel 341

Dolomites, Scanning electron microscopy of quartz in Precambrian cherts and, from Southern Africa 160

DOŠEN-ŠVER, D. (with O. LAHODNY-ŠARC and Z. DRAGČEVIĆ): The influence of the activity of water on the phase composition of aluminum hydroxides formed by reaction of amalgamated aluminum with water 153

DRAGČEVIĆ, Z. (with O. LAHODNY-ŠARC and D. DOŠEN-ŠVER): The influence of the activity of water on the phase composition of aluminum hydroxides formed by reaction of amalgamated aluminum with water 153

E

EBERL, D.: Reaction series for dioctahedral smectites 327

The effect of grinding on the structure and behavior of bentonites, by U. Mingelgrin, L. Klinger, M. Gal, and S. Saltzman 299

Effects of micro-sized mixtures of kaolin minerals on properties of kaolinites, by W. D. Keller and R. P. Haenni 384

EISMA, D. (with S. J. VAN DER GAAST and A. D. VAN LANGEVELD): A comparison of the effectiveness of eight methods for the removal of organic matter from clay 361

Electron spin resonance studies of iron oxides associated with the surface of kaolins, by B. R. Angel and W. E. J. Vincent 263

The electrostatic interlayer forces of layer structure minerals, by R. F. Giese 51

ELEK, S. (with J. HLAVAY, K. JONAS, and J. INCZEDY): Characterization of the particle size and the crystallinity of certain minerals by IR spectrophotometry and other instrumental methods—II. Investigations on quartz and feldspar 139

ELTANTAWY, I. M. (with M. BAVEREZ): Clay-organic molecule interactions: Oxidation of acetaldehyde by montmorillonite in N₂ atmosphere at room temperature 285
